PROFESSIONAL SUMMARY

Second-year IT undergraduate who enjoys building complete, end-to-end systems, from backend architecture and database design to AI-integrated functionality like chatbots. Strong foundation in OOP, Data Structures & Algorithms, and databases. Comfortable across the full development lifecycle, including collaborative version control and testing. Currently building hands-on skills in cloud infrastructure, mobile app development, and Linux.

EDUCATION

- **University of Moratuwa**
B.Sc. (Hons) in Information Technology
(CGPA : 3.02/ 4.0)
- **Rajapaksha Central College Weeraketiya**
GCE Advanced Level : Z-score 1.7749
GCE Ordinary Level : 7 A 1 B 1 C passes

Katubedda , Sri Lanka
2024 - 2028

Weeraketiya, Sri Lanka
2012 - 2022

PROJECTS

MediCareX: Pharmacy Supply Chain Management System (GROUP) [🔗](#)

Technologies: React 19, TypeScript, NestJS 11, Firebase, Groq API, Pinecone, Node.js, Tailwind CSS, React Native

- Contributed end-to-end to MediCareX, an e-pharmacy platform, starting with system design by creating the core Use Case diagram and designing the complete Pharmacist Dashboard interface. Developed the mobile application using React Native, implementing navigation, product browsing, and cart & checkout functionality, along with a ratings and reviews system across both web and mobile platforms. Built an AI-powered bilingual (English/Sinhala) health assistant chatbot using Groq, and implemented core pharmacy operations including prescription upload, a pharmacist POS system, and a full pharmacist dashboard featuring analytics, inventory lookup, and PDF report generation. Also handled patient and order management, covering order tracking and patient history.

EventHive – Event Management & Ticketing Platform [🔗](#)

Technologies: Next.js (React), TypeScript, Spring Boot (Java), MySQL, Tailwind CSS, PayHere API, Groq API, JWT, HTML5-QRCode | (Personal Project)

- Independently developed a full-stack event management and ticketing platform with JWT-based secure authentication and a dynamic, interactive visual seat mapping editor.
- Integrated the PayHere payment gateway with webhook-driven verification for automated QR-code ticket generation and instant email delivery via SMTP.
- Implemented an AI-powered conversational assistant using the Groq API for personalized event recommendations, and built a real-time QR scanner for seamless attendee check-ins at venues.

Dighayu – Medical Center Management & POS System [↗](#)

Technologies: Next.js (React), TypeScript, Firebase, Tailwind CSS, Stripe API, Notify.lk SMS API, Chart.js, jsPDF | (Personal Project / Freelance Project)

- Independently developed a comprehensive full-stack Point of Sale (POS) and clinic management platform with secure Firebase authentication and a dynamic admin dashboard for handling appointments and records.
- Integrated the Stripe payment gateway for secure medical billing transactions and implemented the Notify.lk SMS API for automated appointment confirmations and real-time patient alerts.
- Implemented interactive data visualization using Chart.js for real-time clinic analytics and built an automated PDF report generation module using jsPDF to streamline administrative operations.

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, Python, SQL, HTML/CSS
- **Backend:** NestJS, Spring Boot, Node.js
- **Frontend:** React, Next.js, Tailwind CSS
- **Mobile Application:** React Native
- **Databases & Storage:** PostgreSQL (Neon), MySQL, MongoDB, Firebase (Firestore)
- **DevOps & Cloud:** AWS, Docker
- **Testing:** Postman, Cucumber(BDD)
- **Developer Tools:** Git, GitHub, Swagger / OpenAPI, Jira

CERTIFICATES

- PHP with MySQL – Udemy [↗](#)
- Mastering React 18 – Udemy [↗](#)
- JavaScript From Scratch – Udemy [↗](#)
- CSS, JavaScript And Python Complete Course – Udemy [↗](#)
- AWS Cloud Practitioner Essentials – AWS [↗](#)

EXTRACURRICULARS

- Design Co-Lead - IEEE RAS Student Branch
- Member - Rotaract Club
- Designer - FIT Moments
- Designer - IET

LANGUAGES

- English , Sinhala (Native)
